The Dallas Morning News Selects Westfalia Technologies to supply its ASRS

York, PA, January 2006 – Westfalia Technologies (www.WestfaliaUSA.com), a leader in warehousing and plant automation has been selected by *The Dallas Morning News* to provide an Automated Storage and Retrieval System for its new South Dallas, post press and distribution facility located in Dallas' southern sector.

The single aisle AS/RS features crane redundancy and Westfalia's patented triple pallet support system and will be the first installation for Westfalia within the Newspaper Industry. Al Kafka, Westfalia's Newspaper Industry Specialist said "We are very excited to be selected by *The Dallas Morning News* on this project. It is an excellent opportunity for us to showcase the advantages of this approach in the industry.

About Westfalia Technologies

For 35 years, Westfalia Technologies has been a leader in providing material handling systems designed to meet specific customer requirements. The company creates innovative material handling solutions to support customer distribution and storage needs. Westfalia's products include automated storage and retrieval systems, pallet flow systems, warehouse management software, palletizing and conveyor systems.
