**For Immediate Release**

**Westfalia Technologies Overhauls Website**

**YORK, Pa., March 22, 2007,** –Westfalia Technologies has re-launched its company website with improved look, feel and functionality. Designed to provide optimal ease of use and more in-depth product information, the site features a new homepage, updated graphics, and a user-friendly navigation system.

Site visitors can view product details and specifications, download product brochures, read company news, and review installation spotlights at [www.westfaliausa.com](http://www.westfaliausa.com). The drop-down, tabbed navigation system allows users to find complimentary products to complete their systems, or find products specific to an industry sector.

“This redesign is intended to not only attract new business, but also to keep our current customers updated,” says Ryan Smith, Vice President of Technology for Westfalia. “Westfalia has made great progress in the past few years, and we felt that our web portal should both reflect that progress and provide more in-depth information for our customers, contractors and consultants.”

Westfalia Technologies has been a leader in providing material handling and packaging systems for more than 35 years. Products include Automated Storage and Retrieval Systems (AS/RS), Warehouse Management Systems (WMS), conventional Pallet Flow and order selection systems, Conveyor Systems, conventional and robotic Palletizing Systems, stainless steel Case Packing systems, stacking and handling equipment, and Automated Parking Systems. The company is based in York, Pa., and services the food and beverage, newspaper and pressroom, biotech, and storage industries, among others, with a client roster that includes the *Dallas Morning News*, Hershey Creameries, Kelloggs, Talecris Biotherapeutics, and Global Stone.

**About Westfalia Technologies**

Westfalia Technologies is a leader in providing material handling systems to support customer distribution and storage needs with over 35 years experience. Westfalia's industry leading logistics solutions include: Automated Storage and Retrieval Systems (AS/RS), Savanna.NET® Warehouse Management Systems, Conveyor Systems, Order Pick Systems (SmartPick® Pick-to-light, RF, Pick-to-Voice, etc.), conventional and DeepLane™ Pallet Flow Systems, Layer Forming and Robotic Palletizers, Automated Parking Systems and DEAM case packaging systems with associated conveying, stacking and handling equipment. Our in-house design and manufacturing capabilities provide the service and flexibility to customize our products to your exact needs.
