Westfalia Technologies, Inc. at MODEX 2012 Booth # 3611:

Flexible AS/RS Designs for Any Size & Shape Warehouse

From Conventional Low-Bay Facilities to High Rise Systems

AND

Version 2.3 Savanna.NET® WMS Visualization & Demo

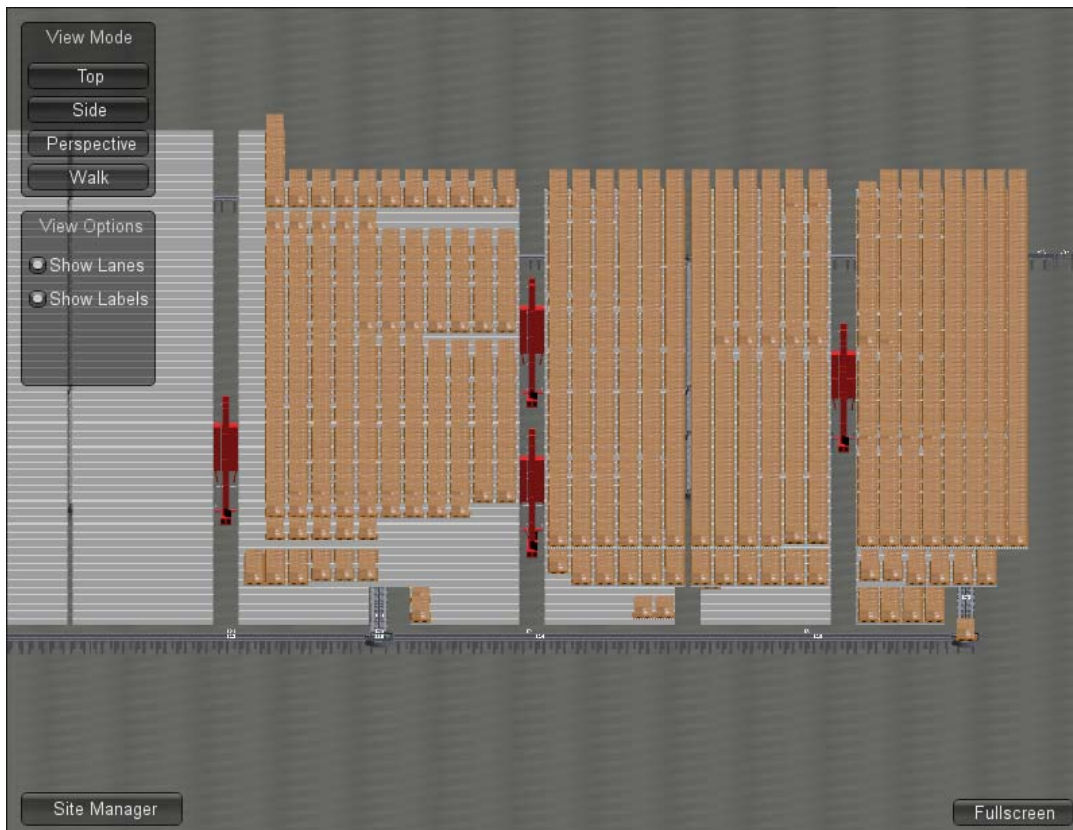

YORK, PA., October 11, 2010 – On show at Westfalia's Modex booth #3611 are flexible Automated Storage & Retrieval System designs proving AS/RS solutions for all size and shape warehouses – from doubling or tripling storage capacity of existing conventional low bay warehouses to new green field high rise projects -- and Westfalia's Version 2.3 of their *Savanna.NET®* Warehouse Management Software.

Westfalia's 35 years of experience developing flexible Automated Storage & Retrieval System (AS/RS) designs for all size and shape warehouses will be demonstrated through case studies from a variety of industries, including, food,

beverage, dairy, publishing and more. Stop by their booth to learn more about recently completed high density AS/RS projects, including Gehl Foods AS/RS in a building only 22' high where storage capacity was tripled, and FAGE USA's AS/RS expansion which enabled growth within a minimal footprint. In addition to spotlighting their experience in low bay warehouses, Westfalia's booth will highlight integrating AS/RS with order picking via High Speed Layer Picking and Mixed Layer Picking.

Key features of *Savanna 2.3* include real time 3D visualization of the warehouse; a dashboard for tracking key statistics of warehouse operations; streamlined user rights management interfaces; and improvements to the order picking module for integrating third party picking solutions (i.e.; high speed layer picking and mixed layer picking). *Savanna* user screens applying actual warehouse data will demonstrate the 3D Visualization of a warehouse from any angle, including walking through it and bird's eye view.

The *Savanna 2.3* Dashboard is web-based, and allows clients to plug in the statistics they wish to track, with real time data. User improvements include the ability for users to develop and save their own data filters, thereby allowing even greater flexibility for all

levels and types of users. Also, user groups and rights are easier to configure and manage with *Savanna* 2.3. Like all other aspects of *Savanna*, the new dashboard and 3D Visualization modules are flexible enough to be integrated into warehouses controlled by other WMS's, where *Savanna* WCS is used.

Stop by Modex booth # 3611 to see *Savanna*.NET® WMS Version 2.3 in action, and to learn more about Westfalia's versatile AS/RS designs for low bay warehouses, including options for high speed layer picking and more. Westfalia's *Savanna* WMS will be available for personal demonstration at anytime throughout the show. Additionally, contact Westfalia at 800-673-2522 or visit www.WestfaliaUSA.com or www.Savanna.com.

About Westfalia Technologies, Inc. (www.WestfaliaUSA.com)

Westfalia Technologies, Inc. is a leader in providing logistics solutions for plants, warehouses and distribution centers. Our expertise combining software (WMS) development with machinery manufacturing reveals Westfalia's ability to deliver turn-key solutions to meet each client's specific needs with unsurpassed quality and control. Every day we reduce inventory, labor and shipping costs, as well as improve throughput and accuracy for a wide range of businesses. Westfalia's products include Automated Storage and Retrieval Systems (AS/RS), *Savanna*.NET® Warehouse Management Systems, conventional and DeepLane™ pallet flow systems, conveyors, order pick systems, layer forming palletizers, automated parking systems and stainless steel case packing, stacking and handling equipment.
