**Westfalia's Full Line of Case Handling Equipment for Cooler
Warehouses in the Dairy, Juice and Beverage Industry**

*Keeping beverage cases moving from case packing to the shipping
dock – either bypassing or entering storage systems*

**See Westfalia at [InterBev booth # 334](#)
and at [Pack Expo booth # 6241](#) (Lakeside Center)**

YORK, Pa., October 7, 2008 – Westfalia Deam Systems' offers a complete line of Case Packing and Case Handling Equipment to move beverage cases throughout a plant -- from fillers to storage and/or the shipping dock -- in either cooler, freezer or ambient environments. Westfalia Deam designs systems to handle various sizes of both corrugated boxes and plastic cases. The designs begin at the Casers, which pack the cases full of bottles, jugs, cartons and Cups and place them onto Case Conveyors. In turn the Case Conveyors move the packed cases to the Stackers, Dolly Loaders or Stack Pushers to load trucks, or the Case Palletizers for fork truck operations.

Westfalia Deam is known throughout the material handling industry for constructing compact, durable, all stainless steel equipment ideal for the tight spaces of juice, dairy and other beverage companies. Our team of in-house mechanical, and electrical engineers design and build the best system to meet your specific needs – whether it's a small facility with tight specifications or part of a larger flow-through option off an automated storage system. As part of Westfalia Technologies, the Deam division profits from an in-house team of mechanical, electrical and software engineers with more than 35 years designing facilities to maximize product flows speeds, efficiencies and throughputs.

Combining the flow-through product process, with the facilities storage needs, is the key to Westfalia Deam designs. If products need storage, Westfalia offers various storage systems including Pallet Flow Storage and Automated Storage & Retrieval Systems (AS/RS). Additionally, all product flows throughout a facility can be planned and tracked via Westfalia's *Savanna*.NET® Warehouse Management System (WMS) software. *Savanna*.NET® is a modular WMS, offering a basic package for even the smallest companies to more effectively track and manage their product flows. Additional modules, such an order selection via pick-to-light, can be added later as companies grow and needs change.

All Westfalia Deam products are guaranteed to perform to their specifications. Each piece of equipment is thoroughly tested (Factory Automation Tests) before shipping and installation at a customer's plant. The equipment's all stainless steel construction makes it ideal for the wet conditions of dairy, juice and other beverage facilities. And of course, Westfalia offers a complete service plan on all equipment to guarantee your peace of mind.

To learn more about Westfalia's complete line of Case Packing, Case Handling and Storage Systems equipment including case stackers, palletizers, inverters, case conveyors and more, please contact Westfalia at 800-673-2522, 717-764-1115 or visit www.WestfaliaUSA.com.

About Westfalia Technologies, Inc. (www.WestfaliaUSA.com)

Westfalia Technologies, Inc. is a leader in providing logistics solutions for plants, warehouses and distribution centers. Their expertise in combining software (WMS) development with automated equipment manufacturing reveals Westfalia's ability to deliver turn-key solutions to meet each client's specific needs with unsurpassed quality and control. To learn more about Westfalia's products, including Case Packing and Case Handling Systems, Automated Storage and Retrieval Systems (AS/RS) and *Savanna*.NET® Warehouse Management Systems, visit www.WestfaliaUSA.com.
