

# DeepLane™ Storage Systems

## Centrifugal Speed Controllers (Brakes)

- All-steel-gears to maximize performance and life of the mechanism
- No springs or mechanical adjustment required
- Westfalia's brake tire maximizes pallet engagement by compressing and taking shape to the bottom board surface, conforming to the shape of warped or cracked bottom boards

## FIFO Storage

Westfalia's DeepLane™ Pallet Flow Storage System can double or triple the capacity of a warehouse. This alternative to drive-in static racks or storing pallets on the floor is ideal for freezer warehouses, food distribution centers and storage of high-volume consumer goods.

### Advantages:

- FIFO inventory control
- Minimize warehousing and handling costs
- Maximize cubic storage space utilization
- Operates in cooler and freezer environments

## Flow Rails

- Standard flow rails are constructed of 4"x 1" galvanized steel with flow wheels mounted in a single or double staggered configuration
- 3" diameter flow wheels are fully-spoked
- Cast aluminum flow wheels are available for added impact protection
