

Savanna.NET® WMS

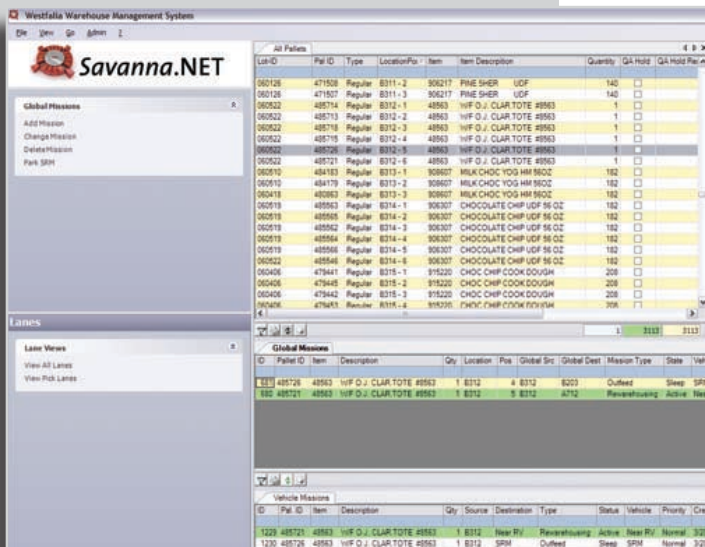

Keeps The Drinks Flowing

Savanna.NET® Warehouse Management Software

- Modules to fit your specific needs
- Optimizes your existing material handling flow systems, including traceability
- Grows module by module in line with your objectives, tasks and requirements
- Certified Microsoft Partner
- Certified SAP Partner
- Easy -to-use tab style interface

Beverages are fast-movers, and the quick movement through the supply chain is vital. Increases in demand require an immediate reaction: higher output entails fast, reliable processing, handling and dispatching of finished products. This is complicated by the requirement to document the purchasing and movement of products. You need software which intelligently and reliably controls all the material flows. This is exactly where *Savanna.NET* comes into its own.

Warehouse Management Solutions for the modern beverage industry

In the competitive beverage industry, it is essential to be able to react quickly. This means having a capable distribution system, including traceability, order fulfillment, sorting, re-packing and dispatching.

Savanna.NET® gives you a competitive advantage by optimizing the interaction of production, packaging, warehouse administration, order picking and dispatch.

Savanna.NET is modular software, which allows you to choose only the modules you require – nothing more, nothing less. As a certified Microsoft Partner, you can rely on *Savanna.NET* to integrate seamlessly with all ERP systems. Plus, it's easy-to-use thanks to its tab style operator interface.

*We support you
when it comes
to your competitiveness.
Make sure you profit from it!*
