

Savanna.NET® WMS

Perfect control of fresh milk products

Savanna.NET® Warehouse Management Software

- Modules to fit your specific needs
- Optimizes your existing material handling flow systems, including traceability
- Grows module by module in line with your objectives, tasks and requirements
- Certified Microsoft Partner
- Certified SAP Partner
- Easy -to-use tab style interface

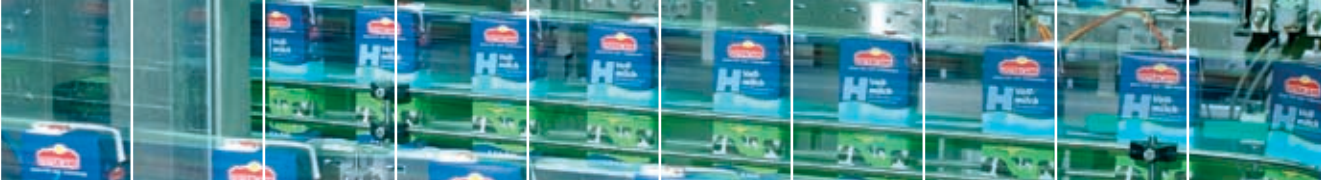

Purity, safety, and the maximum degree of freshness are paramount in the production of milk products. These keys to success are ensured with modern, reliable, and highly efficient production and warehousing technologies. Automating some or all of the production and warehousing systems improves efficiency, makes better use of available resources, and brings transparency to the process. Controlling all these processes intelligently and reliably, is our Savanna.NET® warehouse management software.

Warehouse Management Solutions for the modern milk industry

Our Milk Industry References:

Maryland & Virginia
Milk Producers Cooperative Association, Inc.

Milk products must be stored and removed quickly. Westfalia's *Savanna.NET*® reliably controls and manages all these milk processes, including tracability of lots and products. It gives you a competitive advantage by optimizing the interaction of production, packaging, warehouse administration, order picking and dispatch.

Savanna.NET® is modular software, which allows you to choose only the modules you require – nothing more, nothing less. As a certified Microsoft Partner, you can rely on *Savanna.NET* to integrate seamlessly with all ERP systems. Plus, it's easy-to-use thanks to its tab style operator interface.

**Whether for modernization or new construction,
with *Savanna.NET* we offer you an economical,
efficient material flow solution.**
