Who We Are
Delivering Unparalleled Solutions in Warehouse Automation

Today’s warehouses deal with an increasingly complex mix of demands to meet customer orders and delivery schedules. For over 35 years, Westfalia has been helping companies optimize all the processes within both conventional and automated warehouses, to be more efficient and generate cost savings. We have experience in designing and installing automated warehouse solutions throughout the world covering multiple industries:

- Food
- Beverage
- Chemical & Industrial
- Frozen Food
- Paper & Publishing
- Self Storage Systems
- Third Party Logistics
- Automated Parking Systems

Critical to a successful implementation is a thorough understanding of your economic, technical and organizational needs. Our project management team, consisting of mechanical, electrical and software engineers, partners with you to develop a customized and flexible plan. With full in-house manufacturing and software development we control the project from beginning to end, ensuring quality results. Our dedication to our customers' satisfaction doesn’t end with installation. We offer everything from training, and maintenance to service plans and a 24/7 emergency call line.

Partnering with Westfalia ensures:

- Significantly reduced labor and shipping costs
- More efficient use of warehouse space and equipment
- Electrical and other operating cost reductions
- Improved throughput and raised customer service levels
- Operate in a smaller footprint using little land resources

Our Mission:
To deliver unparalleled warehousing solutions by earning the trust of our customers, understanding their business needs and honoring the commitments we make.

Westfalia’s Savanna.NET® Warehouse Execution System (WES) is a unique warehousing solution comprised of tightly integrated Warehouse Management System (WMS) and Warehouse Control System (WCS) software that conforms to your business processes.

With its flexible modular structure supporting both conventional and automated warehouses, Savanna.NET® is configured to meet each client’s business processes.

Based on Microsoft C# and .NET technologies, Savanna.NET® directs, controls and optimizes internal material flow and order picking as a system-wide software solution. Savanna.NET® offers a broad spectrum of interfaces to various ERP systems, web interfaces and PLC systems.

The Savanna.NET® solution optimizes, manages and controls your storage facility, saving time and money, while also providing the flexibility to select the functions needed to meet your specific business needs.

Cost savings and better customer service accrue from the efficiencies of Savanna.NET® including:

• More efficient use of warehouse space and equipment
• Increased order accuracy resulting in improved customer service
• Reduced losses from stolen, damaged or misrouted products
• Increased labor productivity and throughput
• Lower costs per unit shipped

- Multi-facility support
- Direction of automated material handling equipment
- Manual and directed order picking
- Interface to ERP systems

Cranes and racks alone don’t make an AS/RS. You need a well engineered, comprehensive delivery and put-away system. It’s easy to buy conveyors off the shelf today, but at Westfalia we design and manufacture all of our conveyors in-house because we understand that our clients have unique needs and some of your products require unique handling.

We offer the following conveyor types:

• Pallet handling conveyors
• Vertical lift pallet handling conveyors
• Specialty conveyors
• Robust empty pallet handling systems
• Bag handling conveyors

Regardless of the conveyor type you need, our line of heavy duty conveying systems is built to last yet flexible and easy to integrate. Our durable, powder coated conveyors are available in both mild steel and stainless steel. They are also capable of handling almost any size pallet, including plastic and others. Plus, squaring and profile check stations are integrated into the system in order to guarantee a reliable flow of material.

By partnering with Westfalia, you can count on a system that is rugged, durable and custom designed to satisfy your needs based on our engineered modular design. With our in-house engineering group and manufacturing facility, we will ensure your conveyor system is designed to handle “your” loads.
For 35 years, Westfalia DEAM Systems has been a leader in providing customized case handling and case packing equipment designed to meet specific customer requirements. Westfalia DEAM manufactures stainless steel case packing and case handling systems for the dairy, food and confectionery industries. Using the latest in Solid Modeling technology we design innovative, easily installed, low-maintenance case packing and case handling systems.

Case Packing Systems include:
- Carton Caser
- Dual Drop Half Gallon Caser
- Fractional Quart/1L Carton Caser
- Half Gallon/2L Carton Caser
- High Speed Dual Station Caser
- High Speed Gallon Caser, Jug Caser
- NEP Carton Caser
- Pouch Pack Milk Bag Caser
- Round Bottle Caser

Case Handling Systems include:
- Dual Powered High Speed Case Stacker
- High Speed Case Stacker
- High Speed Destacking
- Dairy Case Palletizer
- Dairy Case Depalletizer

Westfalia DEAM partners with you to meet your specific requirements, developing customized designs to fit your needs. We can work with you to assess your case packing and case handling systems to develop the most efficient and reliable solution.

Key factors in Westfalia DEAM case packing and handling system:
- High-tech equipment: the latest in PLC technology, compact design, high-speed operation and all stainless steel construction
- Custom-design capability: to meet your specific requirements
- Service: providing system installation, operator training and prompt after-sales service

“Westfalia was the most efficient and robust solution out of all of the companies in the market. The design of the AS/RS led us to be more cost and labor efficient.”

- Richard (Rocky) Ruane, Director of Warehouse Operations, Wirtz Beverage Illinois

CREATING PARTNERSHIPS

Quality, reliability, flexibility, that is what defines Westfalia.

We’re committed to your success and are an active partner in every stage of your project: planning, design, manufacturing, installation, testing, training, commissioning and maintenance/service.

Working together and focusing on developing solutions for your success results in long term relationships based on trust and integrity. With extensive experience, we bring a full team of specialists consisting of project managers, mechanical, electrical and software engineers, to ensure smooth project implementation:
- Coordinate the integration of automated systems technologies
- Synchronize with all suppliers for smooth project integration
- Ensure quality control procedures are implemented and maintained
- Ensure budget and contracts are adhered to
- Communicate every step of the way to ensure client satisfaction

In addition, we offer full service programs which include a 24/7 hotline, preventative maintenance, inspection packages, individual spare part management and numerous options for scheduling plant maintenance.
